FROM : Sumitomo Electric Europe Ltd
DATE : 17th July 2015
SUBJECT: MTI-Summit Spb

Dear Valued Customer,

For several years Sumitomo Electric Europe Ltd has been progressing on a strategy to enhance our support for all our customers in Russia. This has included the appointment of partner companies to support specific market segments.

This strategy has also been developed in order to comply with the requirements of Export Control licencing required by the Japanese METI. To meet these requirements the only approved route for Russian customers to purchase Sumitomo Electric RF & Microwave devices is via our authorized partners. Any requests to quote received via other non-approved channels will not be supported.

I am pleased to confirm that MTI-Summit Spb is now confirmed as an authorized sales channel for the supply of these products to our Russian customers.

If you have any questions or concerns regarding this arrangement please feel free to contact me for clarification.

Thank you for your kind attention and cooperation.

Mark Ashworth
Sales Manager, Electron Devices Division
Sumitomo Electric Europe Ltd
